*Re: Academic, Industrial, and Research Radiation Safety Section's Financial Donation to the Early Career Professionals Section*

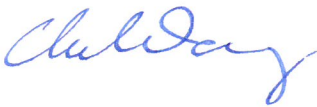

Dear Colleagues of the HPS AIRRS Leadership Team,

On behalf of the Early Career Professionals (ECP) Section, I am deeply grateful for your recent financial donation to our young section, which is only in its second year of full operation. The donation is a testament to the strong sense of community and support within the Health Physics Society.

It is the ECP Section's mission to encourage and enable all professional members early in their health physics career to be actively involved in the efforts and endeavors of the Society at all levels as they transition from the role of a student to the role of a professional. The financial support received from your section will go a long way in ensuring that we have the necessary resources to carry out our goals and objectives to serve our membership and ultimately the health physics community.

Please never hesitate to contact us for any projects that may be mutually beneficial to our respective sections or simply for us to repay your generosity and support.

Sincerely Yours,

Chu Wang

President

Early Career Professionals Section of the Health Physics Society
